

*What
Gets Measured
Gets Done*

F E A T U R E S

SofTrack provides the framework supporting industry best practices for Project Management. The user organizations can have their own development methodology. Different projects in the same organization can use different management methodologies with SofTrack. With SofTrack, your entire project management (planning, tracking, reports and graphs) is on line. The user needs only the browser(IE5 or above).

- Plan the job with natural WBS.
- Delegate the job (Not Transfer!).
- Track status of the job (including everyday EV).
- Track different metrics of the job (with minimum cost).
- Know team performance and individual performance.
- Feed on line status to your customers
- Process centric communication
- Process centric status reports
- Project plan with information at its best
- Built in work flow of status reports
- Team calendar
- Each team members calendar
- Everyday Milestones
- Reporting on Abstract jobs
- Supports both Top down and Bottoms up approaches.
- Measurements - Integral part of Project Management
- Harmonious integration of Process and Team.
- Multiple project handling
- Hierarchical process and Team structures with rollup functionality.
- Cross Project Team Analysis.
- Synchronized WBS and OBS
- Seamless Integration of defect tracking with WBS
- Increased visibility of the Project.
- Need based information to all the team members
- Eliminates the need for planning and tracking department
- Individual personalisation
- No task IDs

All from single Database ! Any Time ! Any Place !

The same power to all the team members !

Cost and schedule metrics should not be in isolation
Other technical metrics should be integrated with cost and schedule metrics

*SofTrack - "For creating leaders in your organization"
-by empowering teams that can plan on their own.*
